📍 Vienna, Austria

EDUCATION

Sun Yat-sen University - M.A. in Journalism & Communication

2019 - 2021

Interaction Design concentration · Guangzhou, China

Sun Yat-sen University - B.A. in Network & New Media

2015 - 2019

School of Communication and Design · Guangzhou, China

CUEJ - Exchange Student

Oct 2018

Centre universitaire d'enseignement du journalisme (CUEJ), Strasbourg, France

Conducted independent research and delivered oral presentations on European economic topics in an international academic environment.

THESES

Effects of Advertising on Search Engine Results Pages on Information Browsing Behavior

2021

Y. Guo

Master's thesis, Sun Yat-sen University - Advisor: Prof. Wu Huiyue

Design of a Community Fire Prevention Service System for Urban Villages in Guangzhou

2019

Y. Guo, J. Xie, T. Zhou, Y. Guan

Bachelor's team thesis (four members), Sun Yat-sen University - Advisor: Su Yun

RESEARCH EXPERIENCE

AI-Assisted Job Application Tracker

2026

Independent project · Vienna, Austria

- Explored how AI can assist job-application workflows while human review remains the decision authority.
- Designed an event-based data model that extracts, classifies, and consolidates job-application events from email data.
- Translated ambiguous lifecycle edge cases into product rules, confidence states, and an auditable scope for review.

Effects of SERP Advertising on Search Browsing Behavior

2020 - 2021

Master's thesis · Sun Yat-sen University · Advisor: Prof. Wu Huiyue

- Investigated how advertising position, format, and quality shape attention and browsing behavior on search engine results pages (SERPs).
- Designed and ran controlled experiments with a Tobii Pro X3-120 remote eye tracker (24 search tasks), analyzing fixation and area-of-interest metrics alongside questionnaires and interviews.
- Derived design guidelines for SERP content and advertising based on how attention shifts between ads and organic results.

Community Fire-Prevention Service Design for Urban Villages in Guangzhou

2018 - 2019

Undergraduate team thesis (four members) · Sun Yat-sen University · Advisor: Su Yun

- Examined how community fire-prevention and rescue services could better support residents of dense, high-mobility urban villages in Guangzhou.
- Conducted field research across 12 urban villages, interviewing residents, community fire teams, and professional firefighters; analyzed needs with user journey maps, service blueprints, and personas.
- Produced a community service-system design: training and incentive mechanisms, a smart smoke-alarm system with resident and fire-steward interfaces, and a VR training program.

PROFESSIONAL EXPERIENCE

MQJC Technology - Product Designer

Dec 2023 - Dec 2025

Wocute project · Guangdong, China

Led product design for consumer products across complex platforms, from discovery and cross-functional delivery through experimentation and post-launch validation.

Tencent - Interaction Designer

May 2021 - Dec 2023

WeChat project · Guangdong, China

Translated ambiguous merchant and customer-service needs into structured workflows and scalable platform patterns, contributing to shipped features through experimentation and feedback iteration.

Alipay - User Experience Design Intern

Jul - Oct 2020

Insurance department · Shanghai, China

Conducted user research and redesigned workflows for an internal merchant platform, translating operational needs into clearer task flows and interface requirements. Supported delivery from discovery and workflow definition through QA and launch.

HONORS & AWARDS

Red Dot Design Award: Design Concept

2020

Finalist

National Scholarship, Ministry of Education of China

2016 - 2019

\$7200 in total. Awarded in each of four consecutive undergraduate years.

China International College Students' "Internet+" Innovation and Entrepreneurship Competition

2017

\$500, National Second Prize

China Software Cup

2017

\$300, Second Prize, National Final

iGEM (International Genetically Engineered Machine) Competition

2017

Gold Medal · Best Software · Best Applied Design nominee. Contributed design and science-communication materials to an interdisciplinary synthetic-biology project.

Times Young Creative Awards

2017

Excellence Award, Poster and Video categories
