Eligible to work in Austria without sponsorship

Profile

Product-oriented designer with 4+ years of experience across complex B2B platforms and consumer health products. At Tencent, translated ambiguous merchant and customer-service needs into structured workflows and scalable platform patterns, contributing to 50+ feature releases. Experienced in product discovery, cross-functional delivery, experimentation and post-launch validation, with working knowledge of REST APIs and web technologies. Currently building an AI-assisted workflow product with human-in-the-loop review logic.

Experiences

Product Designer

MQJC Technology · Wocute Project · Full-time Dec. 2023 - Dec. 2025 · Guangdong, China · On-site

- **Research-Driven Decision Making:** Led discovery and product design for a privacy-sensitive women's health product, using Hot-jar, surveys, usability testing and A/B experiments. Adapted complex health workflows for Arabic RTL and culturally sensitive use cases.
- **Data-informed Innovation:** Partnered with product and engineering teams on iterative releases that contributed to a 40% increase in DAU and a 31% improvement in retention.
- **Cross-Cultural Design Expertise:** Collaborated closely with Product Managers, engineers and legal teams to translate business requirements into user-centered product solutions while ensuring GDPR compliance.

Interaction Designer

Tencent · WeChat Project · Full-time May 2021 - Dec. 2023 · Guangdong, China · On-site

- **WeChat ecosystem:** Translated ambiguous merchant, customer-service and business requirements across the WeChat ecosystem into structured workflows and implementation-ready product requirements.
- **Multi-industry:** Standardized reusable customer-service patterns across multiple business scenarios, balancing vertical requirements with platform consistency and scalability.
- **Agile Execution:** Partnered with product managers, engineers and business stakeholders to deliver 50+ platform features with a 98% on-time delivery rate.

User Experience Designer

AliPay · Insurance Department · Internship Jul 2020 - Oct. 2020 · Shanghai, China · On-site

- Conducted user research and redesigned workflows for an internal merchant platform, translating operational needs into clearer task flows and interface requirements. Supported delivery from discovery and workflow definition through QA, launch and feedback iteration.

Project

AI-assisted Job Application Tracker · Independent Product Project 2026 · Vienna

Defined an event-based data model and human-in-the-loop review logic for extracting, classifying and consolidating job-application events from email data. Translated ambiguous lifecycle edge cases into product rules, confidence states and an auditable MVP scope.

Awards

Red Dot Design Award: Design Concept (Finalist) Sept. 2020

International Genetically Engineered Machine (iGEM) Competition

Gold Medal, Best Software, Best Applied Design Nominee Dec. 2017

Collaborated in an interdisciplinary synthetic biology project involving scientific research, software support, and public-facing science communication. Contributed to translating complex scientific concepts into accessible presentations and visual materials for diverse audiences.

Education

M.S. in Human-Computer Interaction Juli. 2021 Sun Yat-Sen University

B.A. in Internet and New Media Juli. 2019 Sun Yat-Sen University

Exchange Program in Centre Universitaire d’Enseignement du Journalisme, France Oct. 2018

Conducted independent research and oral presentations on European economic topics in an international academic environment.
